

Android VisionableSDK v1.0.1 Release Notes (July 2, 2024)

API CHANGES

none

CHANGES/FIXES

Fixed a crash that resulted when attempting to enable a video preview.

KNOWN ISSUES

While the ability to specify a dedicated Looper upon which all delegate methods are invoked, the current Android MeetingSDK does not attempt to create a dedicated Looper if one is not specified. This will result in all delegate method calls being made on the same thread being used to parse low-level audio and video events coming from our audio/video engine.
