

Android MeetingSDK v0.18 Release Notes (January 4, 2024)

NOTE:

Please see previous MeetingSDK Release Notes for an overview of what was introduced in earlier releases of the SDK.

API CHANGES

none

CHANGES/FIXES

Fixed a thread lockup condition that could occur when the SDK automatically invokes `exitMeeting` as a result of having lost contact with the server for more than 60 seconds.

KNOWN ISSUES

While the ability to specify a dedicated Looper upon which all delegate methods are invoked, the current Android MeetingSDK does not attempt to create a dedicated Looper if one is not specified. This will result in all delegate method calls being made on the same thread being used to parse low-level audio and video events coming from our audio/video engine.

The `VideoView.isScreenShare()` API call will likely return `true` for non screen-share video streams if they are being sent at 4K resolution.
