

Android MeetingSDK v0.2121 Release Notes (April 26, 2024)

NOTE:

Please see previous MeetingSDK Release Notes for an overview of what was introduced in earlier releases of the SDK.

API CHANGES

none

CHANGES/FIXES

Fixed bug which caused echo cancellation to fail on certain Android devices.

KNOWN ISSUES

While the ability to specify a dedicated Looper upon which all delegate methods are invoked, the current Android MeetingSDK does not attempt to create a dedicated Looper if one is not specified. This will result in all delegate method calls being made on the same thread being used to parse low-level audio and video events coming from our audio/video engine.

The `VideoView.isScreenShare()` API call will likely return `true` for non screen-share video streams if they are being sent at 4K resolution.
